Education

Kasetsart University <div align="right">June 2021 - Present</div>
Bachelor of Science in Computer Science | My Transcript <div align="right">*GPAX: 3.71*</div>

Projects

KU-wongnai <div align="right">August 2023 - November 2023</div>
Platform for restaurant and venue reviews   *Next.js, Spring, Laravel, Node.js, RubbitMQ, Kong, Docker, Jira*

- The website helps users find restaurants and reviews, manage their restaurants, order food, and pay online.
- **Front-end Technology:** Used Next.js following Figma design and ShacnUI for reusable components.
- **Back-end Technology:** Implemented microservices with various technologies that communicate using RubbitMQ, including Spring Framework for restaurant, review, and order service, Laravel Framework for user service, and Node.js with Express for payment service.
- **CICD:** Utilized Github Actions for deployment into Docker images and Vercel. Managed the project using Jira.

Beam <div align="right">June 2023 - September 2023</div>
Platform for event management and registration   *PHP, Laravel Framework, MySQL, Docker, Figma*

- Developed a website for event management and registration using monolithic architecture.
- **Technology Used:** PHP with Laravel Framework for the back-end, MySQL for the database, OAuth2 for authentication and authorization, Google Map API for location, and Docker for deployment.

KU-Fondue <div align="right">June 2022 - September 2022</div>
Demo Java desktop application for submitting complaints about Kasetsart University   *Java, JavaFX, CSS3, CSV*

- Developed a desktop application with 3 roles: student, staff, and admin for managing complaints.

Activities

Secretary of the KU-Tech Activity Group <div align="right">March 2022 - Present</div>
KU-Tech Activity Group, Kasetsart University   *Project Management Tools, Teamwork, Time management*
